

FLOODED RIFLE PROTOCOL

First, we are praying for all those adversely impacted by Harvey and Irma.

Flooded firearms and ammunition are usually pretty far down the priority list when you are dealing with massive property loss.

We still want to give everyone a simple protocol to follow when trying to rescue flooded rifles.

CLICK the following links from SAAMI for the best way to deal with flooded firearms and wet ammunition.

We are happy to inspect your barrel and chamber with a bore scope at no cost. We can do this at our sales counter while you wait.

We can only inspect and service modern bolt action rifles.

If you are interested in repairing your bolt action rifle, please take a look at our Deluxe Accurizing package. Your insurance agent can explain how to recover some of these costs.

Please contact us at sales@hillcountryrifles.com or by phone at 830-609-3139.
